

Eugeniusz Haneman

DÉJÀ VU (1950-1970)

Curators: Sławomir Grzanek, Piotr Szczegłów

This exhibition presents the original works of Eugeniusz Haneman created in the years 1950-1970 by means of the noble technique of bromination. Most of the displayed photographs are little-known. However, it will also be possible to see photographs that haven't been on public display yet. The exhibition can be divided into small thematic sections such as portrait, landscape, architecture and reportage. These sections are a testimony to the author's diligence, as he not only took photographs, but also devoted a lot of time to processing the images with an enlarger in a darkroom.
