

Izabella Gustowska

STRINGS OF TIME PART 3: HYBRIDS OF SPACE-TIME (2008-2012)

Curator: Krystyna Potocka-Suwalska

This is the first presentation of this outstanding Polish artist's works in Lodz in 30 years. The author uses the specificity of the Manhattan Gallery space to create an artistic situation which she gave the working title "black hole". The project balances on the verge of truth and fiction. Izabella Gustowska selected parallel universes, the clashes of black holes and other cosmic objects for the topic of her work. The created realities collide with each other and intertwine, leaving the observers to decide whether to unveil the truth and the fiction. In this artistically created situation, she records our real episodic presence in 30-40 short films-objects which she located in various places in the gallery.

The presentation is accompanied by a poster/folder containing a critical text.
